## Where is the reverse switch on my hampton bay ceiling fan

How do I change the direction on my Hampton Bay ceiling fan? Turn the fan on by pressing the "auto" button or the "lo," "med" or "hi" buttons on the remote control, depending on the type of unit. Press the button marked "reverse" or "for/rev" on the remote control to reverse the rotation of the fan. How do I reset my Hampton Bay ceiling fan? First, turn off the power then switch it back on again and within 30 seconds of turning it on you will need to hold down the fan off button for 10 seconds. Doing this will reset it. However, if that didn't work then you may need to sync the sensor in the fan with the remote control. Do Hampton Bay ceiling fans have a lifetime warranty? Hampton Bay ceiling fans have a lifetime warranty on the motor and one (1) year warranty on all other parts (except the glass). For warranty parts replacement, you may be asked for a copy of your receipt. Does Home Depot own Hampton Bay? Hampton Bay Lighting and Fans is a wholly owned subsidiary of The Home Depot. The company manufactures and sells a line of light fixtures and ceiling fans that are available online and at Home Depot stores across the United States and Canada. Do Hampton Bay ceiling fans need to be oiled? An oil hole on the motor means that yes, indeed, the ceiling fan in question is designed to be oiled and needs a regular round of lubrication. It's a good idea to oil the fan annually. Can you use WD 40 on a ceiling fan? Never spray WD40 on the ceiling fan motor, as it is not an oil-based lubricant, it can damage the motor instead of loosening any stuck or rusting parts. Do all ceiling fans have oil holes? Lubricating: Regarding lubricating your ceiling fan's motor, it depends on which brand / model of ceiling fan that you have. Some ceiling fans have maintenance-free double sealed ball bearings that never require oiling. Other ceiling fans have a small "oil hole" above the motor. Should you lubricate a ceiling fan? Like any machine with moving parts, ceiling fans need proper lubrication to run smoothly. Some newer fan models are self-lubricating and don't require much maintenance from you, while others need fresh oil added each year. If you live in a vintage building, your fans probably require lubricating annually. Can you lubricate a Hunter ceiling fan? Things You'll Need The Hunter Original ceiling fan is the only fan manufactured by Hunter that needs oil to lubricate its bearings. When you put in a Hunter Original, you must add oil to the reservoir, or you will damage the motor. If you should move the fan to another location, you may need to oil the fan again. Why is my ceiling fan making a rubbing noise? Tighten the Motor Cover An intermittent noise or scraping noise may be caused by the fan's blade brackets dragging on the fan shroud or motor housing cover. Often you can remedy this by loosening the cover's screws, slightly adjusting the position of the cover, and retightening the screws. How do you lubricate a Harbor Breeze ceiling fan? Follow these steps to Oil your Harbor Breeze ceiling fan: The first step is to climb the ladder, now locate the oil reservoir on your ceiling fan. Now add oil to reservoir, after doing so, test the fan operation to make sure the noise has stopped. Move the blades slowly to rotate them by hand. How do you lubricate a box fan? Remove the front grill of the fan. Lay the fan down on a flat surface with the exposed face up. Apply a light nondetergent household oil that is SAE20. Spray the shaft carefully with lightweight lubricant. Reassemble the fan and test. Remove the front blade guard by prying off the clips or removing the screws.
